Yoga Line

Permanent protection

- Yoga Line is a mattress ticking with an interlaced conductive carbon filament
- Yoga Line prevents the electrostatic charging of the mattress. The comparative test reports of an independent lab prove the functionality of the Yoga Line tickings
- The Yoga Line filament can be woven or knitted. The knitted version is washable at 60 °C.
- Sleeping on a mattress with accumulated static electricity results in restless, uncomfortable nights. People tend to wake up stressed and tired instead of relaxed and ready-for-the day
- Yoga Line repels dust, one of the most common allergenes in the sleeping environment, and diminishes allergic reactions
- Yoga Line mattress tickings help to promote a relaxing, stressfree and recuperative sleep
