Ghent, December 27th 2016

TO WHOM IT MAY CONCERN

We herewith certify that we have developed the CaroDel/Skin+ technology with Devan Chemicals and BekaertDeslee and have successfully tested:

- encapsulation of carotenoid-producing probiotics (report dd. 08 jun 2016);
- germination of the probiotics upon release from capsules applied to textile (report dd. 11 jul 2016 and 11 oct 2016);
- carotenoid production by the probiotics in relevant amounts (report dd. 30 nov 2016);
- transfer of the carotenoids to the skin, also when an additional textile sheet is in between the treated textile and the skin (reports dd. 11 oct 2016 and dd. 30 nov 2016).
